Healthcare + Economic Development

Jolynn Suko,
Chief Innovation Officer

GETTING BACK TO BUSINESS

- Thanks for doing your part to slow the spread

- Able to handle the surge
- Hospitalized COVID-positive cases plateaued
- Restarting elective surgeries (gradually) – May 4th
- People coming back to the ER - important

GETTING BACK TO BUSINESS

- We will continue to have positive cases throughout the community
 - Vaccine 12 – 18 months away
 - No herd immunity
 - Will be bumpy as we re-open
 - Keep surges as low as possible
- Implementing safe practices will help our employees, customers and community
- Evolving advice / best practices on a daily basis

GETTING BACK TO BUSINESS

- How can we re-open safely?
- How can Parkview help?
 - Share what have we learned
 - Create a website to collect what others are doing (CDC, CACP, Toyota, local businesses)
 - Living document
 - Workplace considerations
 - People considerations
 - Establish hotline for questions – 1 day turnaround

Keeping Your Workplace Well

Dr. Jeffrey Boord,
Chief Safety & Quality Officer

WORKPLACE

What is Your Workplace?

- Physical building
- Physical space (ex. room)
- Built environment
- Public or Outdoor Space

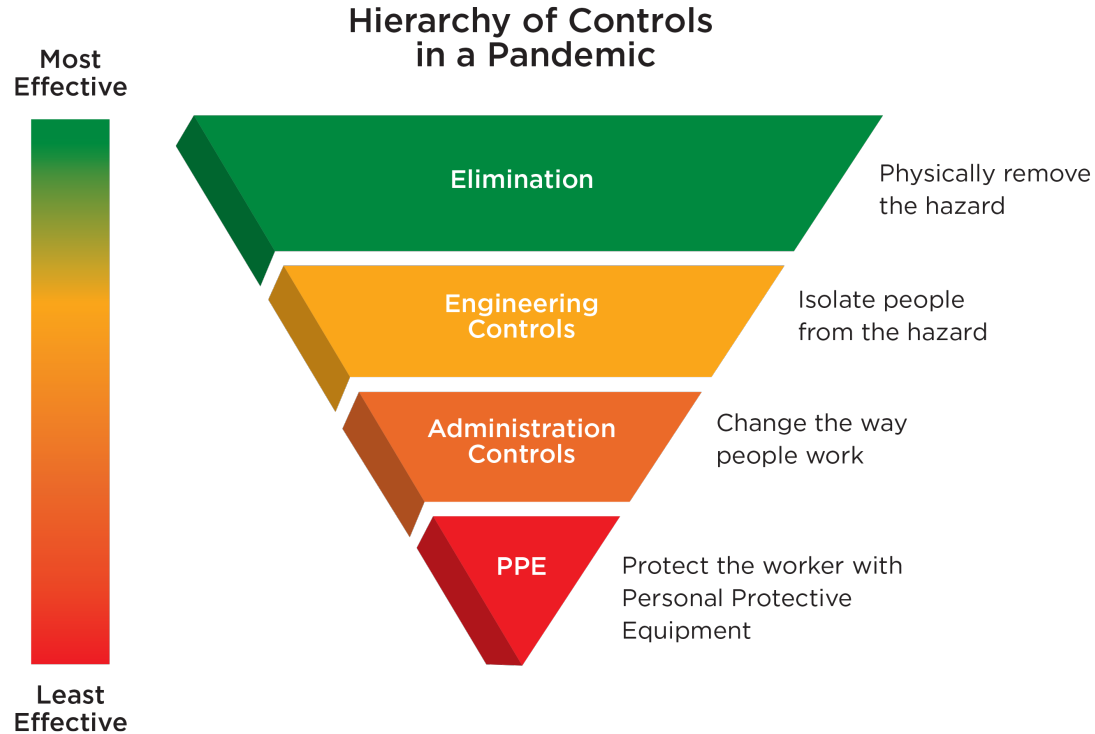

WORKPLACE CONSIDERATIONS

Current Community Status of COVID-19

- Community Spread
 - Not limited to one place or area
 - Part of our day-to-day reality now
 - Source cannot be pinpointed

WORKPLACE CONSIDERATIONS

WORKPLACE CONSIDERATIONS

Workplace Design and Preparation

- Improve ventilation system and engineering controls such *physical barriers*
- Educate and support respiratory and hand hygiene for co-workers & customers
- Routine or enhanced cleaning & disinfection

TESTING

	SAMPLE SOURCE	USES	LIMITATIONS
ANTIBODY	<p>Blood</p>  <p><i>Source: Clinical Lab Products Magazine</i></p>	<ul style="list-style-type: none">• Population Surveillance for Past Infection• Research	<ul style="list-style-type: none">• Unknown if Antibodies are Protective• Many Tests on Market are Inaccurate or Unreliable• Totally Inappropriate for Return to Work Decisions
PCR	<p>Nasal</p>  <p><i>Source: New England Journal of Medicine</i></p>	<p>Diagnose Active Infection in People with Symptoms</p>	<ul style="list-style-type: none">• False Negative Results Common in People Without Symptoms• Person with Negative Result Can Still Become Infectious

MORE THAN A MASK

- Stay home if sick
- Work from home when appropriate
- Cancel unnecessary meetings or travel
- Use virtual conference & meetings

- Closed doors in single office space
- Separate space between desks, tables, etc.
- Remove/reduce number chairs
- Mark floor with 6 feet separation points
- Install hand sanitizer dispensers
- Reduce number of physical entrances
- Remove common touch items

- Limit # of coworkers in office by staggering hours
- Refrain from shaking hands
- Clean personal workstations & offices frequently
- Frequently wash hands and use hand sanitizer
- Stagger lunch and break times

- Know and follow all prescribed PPE measures
- Use appropriate masks in group settings
- Be exceptional stewards of appropriate PPE

Elimination

Physically remove the hazard

Engineering Controls

Isolate people from the hazard

Administration Controls

Change the way people work

PPE

Protect the worker with Personal Protective Equipment

Keeping Your People Well

Dena Jacquay,
Chief Community & HR Officer

PEOPLE

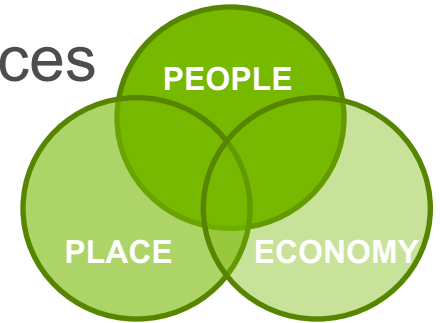

Who are Your People?

- Employees
- Customers
- Vendors
- Community

PEOPLE CONSIDERATIONS

- Identify a workplace coordinator
- Implement flexible, policies & practices
- Educate co-workers how they can help reduce spread of COVID-19
- Consider social distancing policies & practices
 - Vulnerable Accommodation Process

PEOPLE CONSIDERATIONS

Staffing

- Build flexibility/fluidity into plan
 - Internal - Roles, Schedules
 - External - Childcare Availability
- What are you going to keep in your new normal?

PEOPLE CONSIDERATIONS

What Parkview is Doing

- Return to Work Process

Co-workers must call the COVID-19 Hotline if they:

Have questions/concerns regarding COVID-19 symptoms, community exposure, recent travel, family illness, or the return to work process.

Co-workers MAY NOT report to work if they are:

Exhibiting a fever of ≥ 100 degrees, have a persistent cough, and/or shortness of breath. Hotline representative will confirm coworker's need for a leave of absence based on symptom screening and provide estimated return to work date.

Co-workers MAY return to work when:

At least 7 days have passed since symptoms first appeared AND at least 72 hours have passed since fever has resolved without the use of fever-reducing medications. Co-worker must call 260-425-5490 as part of the return to work process.

PEOPLE CONSIDERATIONS

What Parkview is Doing

- Ask them. What do they need?
- Flexing Benefits
- Caring for Mental Health

Industry Specific Insights

Dr. Mike Knipp,
Parkview Total Health Chief Medical Officer

RETAIL CONTROLS

Consider all spaces and surfaces:

- Breakroom refrigerator, coffee pot, water cooler
- Paper

Engage people in being a part of the solution

Communicate the controls you put in place

Control Strategy	Process
Elimination Physically Remove the Hazard	Prevent or remove ill-appearing people from the building Handwashing ¹ Routine housekeeping practices ²
Substitution Replace the Hazard	Substitute health-enhancing policies, programs and practices. Not typically possible in a pandemic.
Engineering Controls Isolate People from the Hazard	Reduce face-to-face contact with customers and between employees ³ Install barriers between people
Administrative Controls Change the Way People Work	Develop policies and procedures to reduce exposure Encourage sick workers to stay home Explore options for flexible worksite and work hours to facilitate social distancing Design hours/access for vulnerable groups Discourage workers from sharing phones, desks and other tools and equipment Minimize face-to-face contact by utilizing virtual communications Redirect traffic flow Limit the number of people in a building at one time
Personal Protective Equipment (PPE) Protect the Worker with Equipment	Follow state and local government requirements Check OSHA ⁴ and CDC ⁵ websites regularly for PPE recommendations Select PPE based on hazard of worker Remove, store, maintain and dispose of PPE properly Consider offering facemasks to employees and customers Educate and promote safe personal hygiene for employees and customers

¹ Use soaps and alcohol-based hand sanitizers with 60% alcohol

² Use products that are EPA-approved as effective against emerging viral pathogens

³ Install physical barriers, like sneeze guards, or use drive-through windows for customer service

Social Distancing in Common Areas

Smoking Areas

- Tables and seating removed from smoking areas to reduce sanitization needs/risks.
- Cigarette butt and smokeless tobacco disposal will be critical and necessary in proper container.
- 6' social distancing marking should be used.
- Ash stations moved to smoking area center.
- Post standard at the location.

Bathrooms

- Add Dividers/Plexiglass between Urinals and Hand Wash Stations
- Sink partitions - 7' high and 4" overhang. If no barrier, close down sinks/faucets for 6' distance.
- Post maximum capacity at entrance.
- Men's urinal partitions - 7' high. If no barrier, close down urinals for 6' distance.

Add
partitions to
separate
spaces

Lactation Stations

- Allow TM to leave site if necessary.
- Remove chairs if they do not meet social distancing guidelines.
- Sanitize area before and after use.
- > 6ft. = zone identification required.
- Remove all unused chairs.
- No sit zone must be marked with X.
- Partition must be 7' high minimum.

COVID-19 Resources for Businesses

Reopening the Workplace

As businesses and organizations prepare to reopen while COVID-19 remains in our community, we face many challenges. As we all navigate a new normal, Parkview wants to be a resource for our community, partnering with you to provide information on best practice. We'll also share our own insights and lessons learned while maintaining operations since the start of the pandemic.

Parkview's plans call for a phased approach that will be dependent on numerous factors. It will require ongoing monitoring and we expect changes and new learning along the way. Our focus is creating a sustained approach – a marathon rather than a sprint – with a focus on co-worker, patient and community safety.

Business Connect

Contact our Parkview team to be connected with resources and receive guidance on how to safely reopen your business. We're here to help!

REOPENING

Q&A SESSION

**GREATER
FORT WAYNE INC.**
METRO CHAMBER ALLIANCE

PARKVIEW
HEALTH

NORTHEAST INDIANA
REGIONAL PARTNERSHIP

Q&A

Should I require all my employees to wear a mask while they work? If so, what kind?

- First, follow State, Local, Industry regulations.
- Consider your Hierarchy of Controls. PPE is the least effective control; does it add any more value to the measures that are more effective?

Q&A

How do I make sure my employees are virus free when they come to work? Should I be doing temperature checks at the start of every shift?

- Right now, at community spread, you will have employees working with or carrying the virus.
- If you want a virus free workplace, everyone should work from home.
- In positive cases of COVID-19, not everyone had a temperature.
- We are not doing routine temp checks at the beginning of shifts.

Q&A

How do we socially distance public spaces like the YLNI Barr St. Market?

- Engineer a flow of traffic for patrons
 - Limit # of Entrances
 - Traffic flow should be one-way
- Consider how to limit # of people accessing the market at one time and how to enforce/monitor
- Vendors should look to cashless or touchless transactions

Q&A

How can you safely social distance a small retail space?

- Do you have the ability to shift or add online offerings?
(Elimination strategy)
- Can limiting # of customers at one time add to your services?
 - More personalized shopping
 - Build relationship with your patrons
 - Increased engagement and purchasing

Q&A

*How do I manage inventory and sales of clothing?
Do I allow fitting rooms and returns?*

- Virus is spread primarily through respiratory. There isn't definitive data on how long it lives on various surfaces
- You may want to restrict fitting rooms (Elimination)
- You do want to be frequently cleaning in between every patron
